2nd Home in Ventura, CA – 800 sq. ft. lawn removed

With lawn = 21,000 gallons of water/year & runoff

Aqua-Flo staff helped re-direct downspouts into bio-swales (dry stream bed).
“After” = 80% water use reduction (from 23,583 to 4,324 gallons), w/ 4,340 gallons of rainwater/year from roof feeding garden, no runoff & new habitat. Cut the parkway curbs: runoff waters plants and soil filters pollutants.
